A READY FIRE-KILLER.

What a Fire Extinguisher Acrem-
plished Last Evening.

A short time ago S. D. Smith arrived in the city from the east, and represented himself as agent for the Stamped fire extinguisher. He called on the chief of the local department, to whom he explained the workings of the little machine and stated that he would like to give it a practical test. An invitation was extended through the columns of yesterday's *Citizen* to the firemen and citizens generally to meet Mr. Smith at the corner of Second and Fourth street, where he would build a big fire, saturating the wood thoroughly with cast oil, and demonstrate how easily the extinguisher could do the work. He had built a frame 12 by 14 feet, and when he finished it off there were assembled quite a crowd of eager spectators. When the flames were quite at their height in my and the inflammable material was fast being devoured, a command was given, and on turning the extinguisher bottom side up he commenced squirting the fluid at the base of the fire. In a few seconds the fire subsided to the ashes. This was repeated, after more cast oil was thrown on, and touched off again, to the entire satisfaction of those present. The stamped is a solid copper machine, built in the most modern style, with all the features of durability and convenience. The chemical or acid charge is contained in an hermetically sealed bottle and rests in the top of the extinguisher. A loose ball is placed in the bottom of the extinguisher and falls through the seal solution when the extinguisher is inverted and breaks the thin glass acid bottle, causing a complete and immediate combination of the chemicals. The fire-killer is then ready for business. Mr. Smith has left one of the extinguishers at the *Citizen* office.

In the Tolls.

John James, the Gallup pugilist—the same scoundrel who deserted a wife and several children for a giddy blonde—and then left Gallup for Cerrillos, has finally got himself in a serious trouble. The blonde, Annette West, followed the gay James to Cerrillos, and her presence had hardly become known before Mayor Austin Goodall, of that town, had them in jail for adultery. They had a preliminary hearing before the justice of the peace of that town, and both were bound over to the next United States grand jury of Santa Fe county—James in the sum of \$500 and the blonde, \$250. As they had no friends to come to their rescue, they were taken to Santa Fe and placed in jail there.

Yesterday Ferdinand Smith was arrested, charged with voting in old town, when he resided in Los Griegos. The case

was heard this morning before United States Commissioner Bryan, and the defendant was promptly discharged, it being clearly proven that Smith's residence was in old town.

L. Garrett, in the train department of the Atlantic & Pacific, died at the company's hospital this morning at 11 o'clock. Underwriter Strong has notified the parents of the deceased at San Jose, Cal. The body will probably be shipped to San Jose for burial.

Cantor, rendered vocal solos, which were heartily encored; the mandolinists gave a selection, and Miss Edith Roebig a violin solo, which were greatly admired, as was the accompaniment played by Miss Jessie Cooley. The toothsome refreshments and dancing which followed, were highly appreciated.
